Call for Application: Project-based Postdoc Researchers (Ishihara-lab)

The project titled "Incorporating human social context into fisheries policies", implemented by Ishihara lab, aims to identify how human social networks affect fisheries management in Japan as the government implements reform legislation, especially output control management.

The project will hire a postdoc researcher with research capacities on common-pool resource management. The researcher must be an open-minded individual motivated to independently engage in research and create outputs (journal papers and policy briefs). The candidate must also be willing to support the Principal Investigator in creating timely reports to the Pew Charitable Trust, which is funding this research.
